Portfolio: <https://louiej-tech.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Meticulous Systems Integrator and AI Automation Specialist bridging a strong background in Electronics & Communications Engineering with advanced full-stack automation frameworks. Certified in n8n, Zapier, Make, and GoHighLevel, with hands-on experience architecting autonomous workflows, custom AI agents, and RAG architectures. Proven track record of leveraging data-driven logic and root-cause analysis to transform complex operational bottlenecks into scalable, automated business solutions.

TECHNICAL SKILLS

- **Workflow Automation & Integration:** n8n, Zapier, Make (Integromat), GoHighLevel (GHL), Webhooks, REST APIs, JSON Data Manipulation
 - **AI & Knowledge Engineering:** Prompt Engineering, RAG Architectures, Vector Databases, Claude LLM Integration, MCP Server/Clients, Custom AI Agents
 - **Systems & Process Design:** Process Mapping, Conditional Branching, Advanced Routing, Error Handling, Root Cause Analysis, Circuit/Data Flow Logi
-

CERTIFICATIONS

- **AI Automation with n8n Full Training Certificate** – Technical Virtual Assistants PH / Tara AI Community (July 10, 2026)
- **Prompt Engineering Full Training Certificate** – Tara AI Community+ (July 11, 2026)
- **HighLevel CRM Full Training Certificate** – Tara AI Community+ (July 30, 2026)
- **No Code Automation with Make.com Full Training Certificate** – Technical Virtual Assistants PH (June 20, 2026)
- **No Code Automation with Zapier Full Training Certificate** – Technical Virtual Assistants PH (May 8, 2026)

PROJECTS

KEY AUTOMATION PROJECTS

Production-Grade RAG AI Knowledge Agent

- Built an end-to-end AI knowledge retrieval pipeline using **n8n** and **Claude LLM**, connecting vector databases to ingest, parse, and structure unorganized technical documentation.
- Applied advanced prompt engineering techniques to reduce hallucinations and ensure contextual accuracy for complex queries.

Multi-Platform Workflow & CRM Integration Pipeline

- Architected end-to-end CRM automation scenarios using **GoHighLevel**, **Make**, and **Zapier** to capture, enrich, and route inbound leads dynamically.
- Configured webhooks, API requests, conditional branching, and data formatting modules to streamline operations without manual intervention.

Automated Data Processing & Notification Engine

- Designed multi-branch automation scenarios in **n8n** and **Make** featuring advanced error handling, looping structures, and custom API integrations.
- Automated cross-platform data synchronization to transform disparate metrics into real-time operational dashboard feeds.

PROFESSIONAL EXPERIENCE

Accenture Inc. | Manila, Philippines

Program & Project Management Analyst (*February – October 2020*)

- Manage multiple, concurrent technical projects end-to-end, ensuring top-tier quality control and on-time technical implementation milestones.
- Formulate, update, and communicate project roadmaps and progress tracking to multi-layered stakeholders, successfully keeping critical project momentum sustained.

Accenture Inc. | Manila, Philippines

Data Analyst (*April 2018 – January 2020*)

- Researched and analyzed highly granular system data sets, consistently exceeding core productivity and system utilization benchmarks.
- Executed operational excellence frameworks, including queue management, root cause analysis, and detailed internal documentation for strategic improvements.
- Maintained absolute synchronization across updating operational procedures, compliance structures, and risk mitigation protocols.

Orange Hillside Food House & Bubble Blossom's Laundry Service | Quezon City, Philippines

Business Operator / Systems Manager (*April 2012 – January 2020*)

- Managed all backend technical, legal, financial, and physical resource management workflows for multiple service facilities.
- Parsed daily, weekly, and monthly statistical data records to optimize inventory supply procurement against forecasted customer demand data.
- Re-engineered manual asset logs into scalable digital tracking models, allowing for agile cost changes relative to market changes.

Bayantel Telecommunications Inc. | National Capital Region, Philippines

Team Leader (DSL Sales) (*November 2011 – April 2012*)

- Directed field engineering and sales assets by delivering real-time technical process consultation and physical asset mapping verification.
- Scouted and mapped geographical sectors to determine resource availability and analyze local market data infrastructure limitations.

Stream Global Services Inc. | Quezon City, Philippines

Technical Support Professional (*November 2009 – January 2011*)

- Provided high-level hardware troubleshooting, technical diagnostics, and system configuration resolutions for enterprise and consumer hardware.
- Handled advanced tier-1 escalations, provided workflow authorization overrides, and mentored new hires to reduce operational ramp-up times.

EDUCATION

Bachelor of Science in Electronics and Communications Engineering

AMA Computer University — 2008
